Translating strategic and business requirements into sophisticated and innovative technology solutions.

Services Portfolio

Technical and Business Expertise

We use our comprehensive technology and engineering capabilities to design, develop, test, deploy, and sustain mission-critical, high-performance architectures and business solutions in the following areas.

❖ Application Modernization / Cloud Solutions ▶

Develop and migrate cloud-based, mobile, and hosted applications focused on business objectives

▪ Legacy Migration

▪ Cloud Integration

▪ Cloud App Development

▪ Mobile Enablement

❖ Solutions Development and Operations ▶

Using our agile processes to deliver new system functionality continuously, and enabling the integration of development and operations to improve product delivery, quality, and stability

▪ Agile Development

▪ Data Architecture and Management

▪ Application Integration

▪ Operations & Maintenance

❖ Business Intelligence and Data Analytics ▶

Design and construct corporate information repositories that use operational data to improve decision making and increase productivity

▪ Data Governance and Quality

▪ Enterprise Data Management

▪ Business Intelligence

▪ Data Modeling and Integration

❖ Information Assurance & Cybersecurity ▶

Implement NIST and DoD information assurance and security strategies that monitor critical systems to identify vulnerabilities and risks, and safeguard business-critical applications and data

▪ Security Audits and POA&Ms

▪ Risk and Vulnerability Assessments

▪ IT Security and IA Policies

▪ Certification & Accreditation

❖ Enterprise IT Support ▶

Manage and support enterprise technology solutions and platforms and ensure they are secure, efficient, available, and reliable

▪ Systems Engineering

▪ Infrastructure Support

▪ HR and Financial Management

▪ Production and User Support

❖ Program Management Support ▶

Provide strategic planning, technology advisory, and program office support to maximize the investment in IT initiatives

▪ CPIC and OMB Support

▪ Program Support

▪ Cost/Benefit Analysis

▪ Organizational Development

Information Technology professionals with the competence and dedication required to ensure the success of any IT project.

We successfully tailor our services to meet the unique requirements of a wide range of clients and built a track record of successful contract performance.

Success Stories

Customer	Task	Result
Application Modernization / Cloud Solutions		
Executive Office of the President (EOP) / Office of National Drug Control Policy (ONDCP)	<ul style="list-style-type: none"> Improve operations by providing development and deployment support for new portal-based ONDCP business applications. Design and implement an overarching ONDCP solutions architecture; and provide user training and guidance to effectively maintain newly developed applications. 	<ul style="list-style-type: none"> Developed new portal solutions that incorporate a robust content collection architecture, security framework, and advanced workflow automation. Assist ONDCP leadership in planning and managing the organization's content and collaboration capability expansion to ensure adherence to best practices while optimizing content storage and system performance.
Department of Treasury / Bureau of Engraving and Printing (BEP)	<ul style="list-style-type: none"> Migrate legacy applications, and design, develop, deploy, and maintain feature-rich portal-based Microsoft business solutions. Provide end user support; systems administration; database management; and user training for BEP's enterprise applications. 	<ul style="list-style-type: none"> Implemented over 100 new solutions that improve data security and decision-making capabilities; as well as user productivity, efficiency and collaboration. Deployed a robust enterprise solutions development framework using Agile development processes, integrated development and management tools, and a consolidated data architecture.
General Services Administration	<ul style="list-style-type: none"> Migrate legacy GSA applications to cloud-based solutions utilizing Google and Salesforce / Force.com platforms. Provide application development support nationwide and manage / administer the server infrastructure for IBM applications and solutions. 	<ul style="list-style-type: none"> In coordination with OCIO, planned and migrated hundreds of Lotus Notes Domino applications to cloud-based solutions. Our support enables GSA to strategically prioritize applications for migration to ensure seamless integration into the new cloud-messaging infrastructure.
Solutions Development and Operations		
Office of Naval Research (ONR)	<ul style="list-style-type: none"> Provide technical assistance, systems engineering, software support services for ONR's Oracle based post award contract and grant management system. Support Java, .NET, and PL/SQL applications necessary for post award administration. 	<ul style="list-style-type: none"> ONR program analysts now have the capability to track grants/contracts from award through submission of requests for payment/invoices. Grantees and contractors have a means to electronically submit requests/invoices for payment.
Business Intelligence and Data Analytics		
Department of Housing and Urban Development / Federal Housing Administration (FHA) National Servicing Center (NSC)	<ul style="list-style-type: none"> Design, procure, develop, implement, secure, and host a robust enterprise analytics and business Intelligence solution. Provide a secure and operational IT infrastructure that delivers BI and analytics reporting to support the transformation of NSC. 	<ul style="list-style-type: none"> Provided analytical and statistical services, a suite of SAS 9.1.3 enterprise BI tools, and a 24x7 Orizon hosted infrastructure to allow HUD to effectively measure the performance and risks associated with the mortgage industry's servicing of the FHA insured mortgages of single family homes, which was not previously feasible..
Enterprise IT Support		
Department of Justice / Federal Bureau of Investigation (FBI)	<ul style="list-style-type: none"> Upgrade the Bureau's Microsoft Windows desktop and server infrastructure. Implement a multi-vendor high-speed local- and wide-area network communications infrastructure at FBI locations worldwide. 	<ul style="list-style-type: none"> Completed migrations at 600 field sites serving 30,000 users ahead of schedule, on budget, and with minimal operational impact. Our staff was a key contributor to the deployment team responsible for upgrading approximately 25,000 servers and workstations, and 3000 switches.
Program Management Support		
Department of Homeland Security	<ul style="list-style-type: none"> Provide Human Capital (HC) strategic planning support to the Office of the Chief Human Capital Officer. 	<ul style="list-style-type: none"> Developed the HC Strategic Plan (HCSP) along with metrics, measures, and evaluative methods to ensure that objectives are met and results are realized.
